

Custom training is always private.

One instructor, one company per session. This provides you with a tailored learning experience that allows us to focus on your specific training goals.

On-site training is also available!*

We will bring a projector and require 2 electrical outlets, a desk or table for the projector, and a blank screen or clean wall space to project upon. You are welcome to set up your systems, so attendees can work along, or simply follow along with the instructor round-table style.

**Additional travel costs may apply*

Our classroom holds 6 attendees.

Each attendee will have their own workstation programmed with the latest version of the software, while the instructor leads via overhead projector.

Train with your own designs.

We recommend using your parts and designs. We will be happy to sign your Non-Disclosure Agreement for training on proprietary part designs. You can also choose from our large, diverse library of samples to use for your training examples.

Current Streamingteacher® subscription* is required to attend training.

The Streamingteacher® courseware is used exclusively for the Mastercam study of our materials and highly recommend for continued learning after the completing of our class.

Streamingteacher® provides over 150 hours of classroom study material, examples and sample files.

**Sold separately. To order, go to www.streamingteacher.com*
