

Better Access to the Most Advanced Mastercam

An economical solution to maximize your productivity.

Mastercam Maintenance provides you with valuable features and benefits to get the most out of your CAD/CAM investment. Maintenance customers always have access to the latest technology available and are first to receive the latest software and updates from Mastercam.

This access translates to numerous opportunities for **cost savings** and **productivity gains**.

With each major release — and all the updates in between — Mastercam empowers machinists, programmers, and engineers to work faster and be more productive. When your machines run efficiently and your cutting tools last longer, you improve your options to make more money.

The value of staying up to date with Mastercam is substantial:

- Your potential savings — through tooling and machine improvements alone — far outweigh the cost of Mastercam Maintenance.
- It is not uncommon to spend more money on tools for a single job than the cost of Mastercam Maintenance for an entire year.
- The latest versions of Mastercam include advanced toolpaths that produce less wear and tear on the cutting tools and smoother tool motion that reduces wear on CNC machines.
- Tooling costs often contribute 3-10% to the cost to manufacture.

Savings Example: If you increase tool life by **20%** with an advanced toolpath, and one job uses 15 endmills at \$100 each, you could **save \$300** alone on that one job!

- Recent Maintenance releases have introduced toolpath enhancements that **reduce cycle time** and **improve surface finish**.

Savings Example: If you use **improved toolpath strategies** on a job that normally takes 5 hours to run, and the runtime is reduced to 4 hours, you **save 20% on machine time** alone!

- Maintenance offers **great value** for the money. Besides the next major release, you also get all the updates and mid-version releases for competitive advantage.

Savings Example: It costs more to purchase updates than to become a Maintenance customer, so you can **save money and stay current** with Mastercam.

- Maintenance also allows you to budget for a recurring expense to **avoid a surprise expenditure** when the need to update becomes inevitable.

See second page for additional benefits of Mastercam Maintenance.

Only Maintenance customers can beta-test Mastercam. Advantages include:

- Learning about developments before they are released to the public.
- Working with the latest technologies before they reach the market.
- Providing high priority feedback to guide ongoing development.

Additional benefits of Mastercam Maintenance:

- Access to new features and enhancements — often before they are released to market.
- Prioritized technical support ahead of non-Maintenance customers.
- Mastercam University webinar content.
- Tutorials, files, posts, tool libraries, and more from the Mastercam Tech Exchange.
- Ability to import customer files with the latest file translators.

Save money with Maintenance — and never settle for anything less than the very best of Mastercam.

Outperform your expectations.

Beyond the extensive, leading-edge features for precision and efficiency, what we do best at Mastercam is create code to drive your CNC equipment. You cut parts, not pixels, and our toolpaths help your machines achieve a reliable, efficient, smooth, and accurate motion.

Part quality, extended tool life, repeatability — even the longevity of your machines — are directly related to this motion, and our customer support network is second-to-none. For more than 35 years, Mastercam has helped our customers outperform expectations.
